GENERAL INFORMATION:
APPLICANT: Prast, Gerald
APPLICANT: Nossbaum, Sabine
APPLICANT: Nossbaum, Sabine
APPLICANT: Mossbaum, Sabine
APPLICANT: Mossbaum, Sabine
APPLICANT: Mossbaum, Sabine
TITLE OF INVENTION: REDUCTION OF INTERFERENCE OF IMMUNOASSAYS BY SUBSTANCES
TITLE OF INVENTION: REDUCTION OF INTERFERENCE OF ANTIBODIES
TITLE OF INVENTION: REDUCTION OF THE FRAMEWORK REGIONS OF ANTIBODIES
TITLE OF INVENTION: MAD 9228 4897/00/US-Im
CURRENT FILING DATE: 1992-06-25
EARLIER APPLICATION NUMBER: US/09/344,587

                                                                                                                                                                                                                                                                                                                                 Sequence 3, Application US/08356272
Patent No. 5766946
GENERAL INFORMATION:
APPLICANT: Ciantriglia Dr., Mau
TITLE OF INVENTION: Monoclonal
COMPUTER READABLE FORM:
MEDIUM TYPE: Floppy disk
COMPUTER: IBM PC compatible
OPERATING SYSTEM: PC-DOS/MS-DOS
SOFTWARE: Patentin Release #1.0, Ve
CURRENT APPLICATION DATA:
APPLICATION NUMBER: US/08/356,272
FILING DATE: 15-DEC-1994
CLASSIFICATION: 435
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      Matches
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   Query Match

Ig kappa chain V region (4-4-20) - mouse (fragment)
C;Species: Mus musculus (house mouse)
C;Date: 31-Jul-1989 #sequence_revision 31-Jul-1989 #text_change 21-Jan-2000
C;Accession: B31485
R;Bedzyk, W.D.; Johnson, L.S.; Riordan, G.S.; Voss Jr., E.W.
J. Biol. Chem. 264, 1565-1569, 1989
A;Title: Comparison of variable region primary structures within an anti-fluores A;Reference number: A31485; MUID:89109167; PMID:2492278
A;Reference number: A31485; MUID:89109167; PMID:2492278
A;Rocession: B31485
A;Scatus: preliminary
A;Molecule type: protein
A;Residues: 1-112 <BED>
C;Superfamily: immunoglobulin V region; immunoglobulin homology
C;Keywords: heterotetramer; immunoglobulin
C;Keywords: heterotetramer; immunoglobulin
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       R;Beddyk, W.D.; Herron, J.N.; Edmundson, A.B.; Voss Jr., E.W.
